ABOUT ME

Hi there! I'm a dedicated Full-Stack Web Developer with experience in cloud computing and a focus on delivering innovative solutions. My expertise spans many industries, including real estate, banking, business intelligence, and government initiatives. I specialize in React and Node and have hands-on experience with JavaScript, Java, MySQL, PostgreSQL, MongoDB, Spring, Docker, and Azure.

I'm knowledgeable in agile methodologies and a certified AZ-900 professional, and I'm continually focused on honing my skills in Microsoft Azure solution architecture. With a proven track record of delivering high-quality, reliable code using SOLID principles, I'm committed to writing clean, secure, and efficient code that meets project requirements and exceeds expectations.

I'm open to part/full-time opportunities to work with other talented professionals and organizations. Let's collaborate and create innovative solutions that drive success. Please feel free to reach out to me at joshbarrosweb@gmail.com or goldenglowitsolutions@gmail.com to discuss potential opportunities.

KEY ACCOMPLISHMENTS

- Successfully designed and implemented responsive and dynamic user interfaces using ReactJS and MaterialUI, resulting in improved user engagement and satisfaction for a range of clients and projects.

-
- Consistently collaborated with cross-functional teams, including UX/UI designers and QA testers, to ensure high-quality delivery of features and functionality, resulting in improved project outcomes and customer satisfaction.
 - Effectively managed and prioritized project tasks and deliverables using SCRUM methodologies, resulting in timely delivery of project milestones and improved team efficiency.
 - Demonstrated expertise in developing RESTful APIs using NodeJS frameworks, including Nest and ExpressJS, resulting in improved data access and storage capabilities for complex web applications.
 - Applied best practices in code development and testing to ensure high-quality, reliable code across projects, resulting in fewer errors and reduced maintenance overhead.
 - Proven ability to adapt and learn new technologies and frameworks quickly, resulting in expanded technical expertise and the ability to contribute to a diverse range of projects and industries.

OBJECTIVE

My goal is to work in agile and collaborative teams, contributing with the knowledge acquired so far to deliver valued services, in a company that provides me with an opportunity to grow and advance in studies in Software Engineering.

TECH SKILLS

Front-End: HTML, CSS, JavaScript, Bootstrap, MaterialUI, TailwindCSS, VueJS, NuxtJS, ReactJS, NextJS, Angular.

Back-End: PHP, Laravel, NodeJS (Express and NestJS), Java EE (JSP, JSF), Spring (Security, JPA, JDBC, MVC, REST, ThymeLeaf).

Database: MYSQL, PostgreSQL, MongoDB.

Operational Systems: Windows 10, Ubuntu, Debian Linux.

Servers: NGINX, Apache, Tomcat.

DevOps: Docker, Terraform, Github Actions.

API: REST, GraphQL

Versioning: Git

Dependency Managers: Maven, Gradle, NPM, Yarn, Composer.

CMS: WordPress (Elementor / Gutenberg / WooCommerce / Custom Theme)

Cloud: Microsoft Azure

EXPERIENCE

Company: Alpha Technologies USA

Starting Date: 02/05/2022

End Date: 04/12/2022

Tech Stack: ReactJS, TypeScript, MaterialUI, Redux.

Highlights:

- Worked on a variety of projects, including complex admin panels, business intelligence applications, and real estate applications.
- Utilized ReactJS to build responsive and dynamic user interfaces, converting Figma and Adobe XD layouts into code.
- Employed TypeScript to enhance code reliability and maintainability, reducing the likelihood of runtime errors.
- Utilized MaterialUI to design and implement consistent and visually appealing user interfaces across projects.
- Integrated Redux to manage complex state management across components and facilitate data exchange between front-end and back-end systems.
- Performed back-end work using NodeJS frameworks, including Nest and ExpressJS, to develop RESTful APIs and manage data access and storage.

Company: NTTDATA (Bradesco - Client)

Starting Date: 01/01/2022

End Date: 31/08/2022

Tech Stack: Java (JSF, Spring JDBC, Spring Rest), ReactJS.

Highlights:

- Developed and maintained Java-based web applications using JSF and Spring JDBC frameworks.

-
- Designed and implemented RESTful APIs using Spring Rest to enable data exchange between web applications and mobile devices.
 - Leveraged ReactJS to build a responsive, dynamic Single Page Application (SPA) that was later converted into iOS/Android web views.
 - Collaborated with cross-functional teams, including UX/UI designers and QA testers, to ensure high-quality delivery of features and functionality.
 - Followed MVC architecture patterns, specifically Java Server Faces (MyFaces), to separate application concerns and improve code maintainability.
 - Conducted code reviews and performed unit testing to ensure that the code was well-written and adhered to best practices.

Company: IK Solution

Starting Date: 01/09/2021

End Date: 30/11/2021

Tech Stack: ReactJS, NodeJS (NestJS), PostgreSQL, Docker.

Highlights:

- Developed features and contributed to a government project aimed at supporting entrepreneurs using ReactJS and NodeJS (NestJS).
- Worked with a PostgreSQL database to manage data and handle transactions for the project.
- Utilized Docker to facilitate the deployment of the project in various environments and ensure consistency in the deployment process.
- Followed SCRUM methodologies to collaborate with team members, plan and execute sprints, and deliver project milestones.
- Leveraged Context API to manage authentication on the front-end, ensuring secure access to user data and resources.
- Implemented JWT-based authentication on the back-end, allowing secure and reliable communication between the front-end and back-end of the project.

Company: Freelancing

Starting Date: 01/08/2018

End Date: 31/10/2021

Tech Stack: WordPress, Laravel, VueJS, ReactJS, Spring, NodeJS (NestJS and Express), PostgreSQL, MySQL, Docker.

Highlights:

- I worked on a variety of projects: websites, freelancing-platform MVP, blogs and more.

-
- Developed and deployed responsive, mobile-friendly websites using HTML, CSS, and JavaScript.
 - Collaborated with clients to gather requirements, propose technical solutions, and deliver custom web applications.
 - Built RESTful APIs and integrated third-party APIs to enable data exchange between web applications.
 - Implemented database schemas, data models, and data access layers using SQL and ORM frameworks.
 - Optimized application performance, scalability, and security by applying best practices and testing methodologies.
